

Plug Mix

Extra Plus 15% Perlite, low fertiliser level

Composition:

Rec. L10

Structure:
fine (1 - 7 mm)

Chemical Data:

(according to VDLUFA)

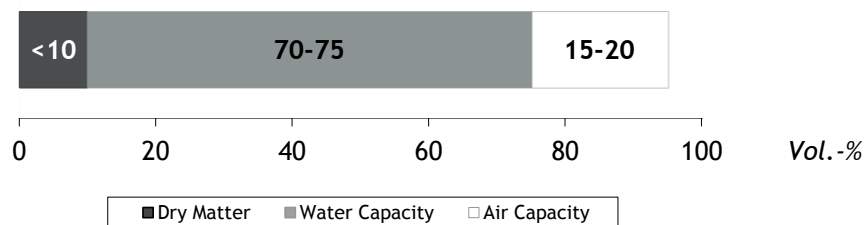

pH-value (H₂O, v/v 1:2.5): 5,5
Salt level (g/l, v/v 1:3.6): 0,3
+ extra trace element fertiliser

Nutrients Added:

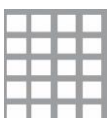

Nitrogen (mg N/l): 42
Phosphorus (mg P₂O₅/l): 30
Potassium (mg K₂O/l): 54
Magnesium (mg Mg/l): 80
with all necessary trace elements
Iron added as EDTA chelate

Physical Data:

(according to EN 13 041)

Trays:

Additional Comments:

Fine-structured seedling substrate with increased air capacity due to the sod peat. Increased drainage for quick development of roots with 15% fine Perlite. Lower fertiliser level adapted to irrigation water available.

Plants:

Vegetable young plants
Seedlings

Low fertiliser level, adapted to irrigation water available.
